Foreign Filing of Secrecy Order Inventions In Designated Countries—Korea Designated on July 29, 1993

37 CFR Part 5

Under the provisions of 37 CFR Part 5 - Secrecy of Certain Inventions and Licenses to File Applications in Foreign Countries - the Patent and Trademark Office may, with the approval of the defense agency sponsoring the secret order, permit the filing of secrecy order applications under 37 CFR 5.5 in designated foreign countries. The designated countries are those where the Government of the United States of America has entered into reciprocal patent secrecy arrangements.

The United States of America has detailed arrangements with 17 countries, most of whom are members of the Coordinating Committee for Multilateral Export Controls (COCOM). These arrangements provide protection for classified and other sensitive inventions when patent applications are being held in secret. These countries are as follows: Australia, Belgium, Canada, Denmark, France, Germany, Greece, Italy, Japan, Republic of Korea, Luxembourg, Netherlands, Norway, Portugal, Sweden, Turkey and United Kingdom.

Such arrangements between the United States of America and the Republic of Korea include the "Agreement Between the Government of the United States of America and the Government of the Republic of Korea for the Safeguarding of Secrecy of Inventions Relating to Defense and for which Applications for Patents Have Been Made," signed at Seoul on Jan. 6, 1992, and implementing procedures thereto ("the 1992 Agreement"). The 1992 Agreement entered into force on July 29, 1993, after which time either Government may permit the filing of patent applications under secrecy with the other Government (the "Receiving Government"), which shall safeguard their secrecy.

The 1992 Agreement stipulates that the rights of private owners of patents and technical information should be fully recognized and protected in accordance with domestic laws applicable to such rights. It also recognizes that privately owned technology should, to the greatest extent practicable, be exchanged through commercial agreements between owners and users. Other provisions are intended to assure fair treatment of private owners when they deal directly with a foreign government and to prevent private information that is communicated through government channels from being used except as provided for in the agreement.

The 1992 Agreement also provides for the establishment of a Technical Property Committee composed of representatives from each government. The Technical Property Committee is

charged with general responsibility, for making recommendations to the two governments on any matters relating to the Agreement which are brought before the Committee by either government. Policy guidance for the representatives of the United States of America of the Technical Property Committee is provided by the Department of Commerce, the Department of Defense, the Department of State and other U.S. Government agencies.

The U.S. Patent and Trademark Office has provided for the addition of the Republic of Korea as a country that is available for foreign filing of secrecy order applications in the following manner:

o As of July 29, 1993, the Republic of Korea will be included in all type 1 secrecy orders (as defined in "Secrecy Order and Permit for Foreign filing in Certain Countries" 51 *Federal Register* 32938 (Sept. 17, 1986), 1071 *Federal Register* 32938 (Sept. 17, 1986), 1071 *Official Gazette* 31 (Oct. 21, 1986)) as one of the authorized countries for foreign filing.

o Any type 1 secrecy order issued prior to July 29, 1993, is hereby modified to include the Republic of Korea as one of the authorized countries for foreign filing after July 29, 1993.

o Under all other U.S. Patent and Trademark Office secrecy orders, foreign filing in the Republic of Korea will be considered on a case-by-case basis under 37 CFR 5.5.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PDTLs have both the patent and trademark sections of the *Official Gazette of the U. S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that prelminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
